

PHYSICAL ACCESS CONTROL

Enhance your security backbone with our award-winning, trusted physical security capabilities.

Discover end-to-end, feature-rich physical access control, video intelligence, and credentialing solutions that fit your unique business needs.

Industry Solutions

We work with more than 5,000 customers and 400 partners to digitally secure the physical world.

From airports to seaports, critical infrastructure to government agencies, hospitals to schools, start-ups to corporations, we protect the people and places that power our lives.

End-to-End Security

Secure, prevent, detect, and protect, inside and out. Our physical access control and video intelligence solutions provide the highest security at the lowest cost.

Velocity Vision Ecosystem

Protect your assets, secure your environment, and transform your operations. The end-to-end solution integrates the most cutting-edge digital technology into your physical security operations. We combine the power of Velocity Vision VMS, Vision AI video analytics, Vision Cloud, Identiv Hyperconverged Infrastructure (HCI), and Hirsch Velocity security management software.

Velocity Vision

We built our unified, open-platform video management system (VMS) to provide a data-enabled security solution delivering intelligence in a single-pane-of-glass view.

Hirsch Velocity Software

Our integrated security management system manages access control and security operations in hundreds of different facilities, from single high secure rooms to multi-building, multi-location campuses.

Enterprise Hirsch Controllers

Physical access Mx Controllers feature scalable, networked, open-architecture designs that control the security of one or multiple doors

Enterprise Hirsch Expansion Boards

Our physical security hardware carries an implied reliability factor. Government-grade Hirsch enterprise expansion boards are trusted and easy to install.

Physical Access Readers

Strong authentication, FICAM compliance, and frictionless mobile options mean our physical access readers provide the high-security technology you need today while preparing you for the future.

IT-Centric, Cloud, Mobile, and Telephone Entry

We offer on-premises and cloud-based access control, Access Control as a Service (ACaaS), and telephone entry systems for enterprise and small-to-medium sized businesses (SMBs).

SMB Access Control

SMBs trust our reliable security management software solutions to connect and manage IT-centric physical access hardware.

SMB Controllers

When you need complete, easy-to-install physical access control for SMBs, our portfolio of hardware controllers makes high security affordable and convenient.

Cloud-Based Access Control

Cloud-based, subscription-model ACaaS solutions allow security management from anywhere, on any device, at any time.

Mobile Access Control

Our mobile access solutions make frictionless physical access possible using technology like GPS and Bluetooth without the need to present a physical credential.

Telephone Entry Systems

The full range of intelligent, integrated, comprehensive telephone entry systems and visitor management solutions are ideal for every type of residential and mixed-use property, including apartments, condominiums, and office buildings.

Credentials

Our credentials, IDs, and smart cards verify the identity of employees, temporary workers, and visitors. The portfolio features form factors for physical or logical access control, converged access, transit payment, brand protection, time and attendance, cashless vending, and IoT applications.

Credentials for Physical Access Control

From enterprise to government use cases, enable employees, temporary workers, and visitors with our portfolio of proximity and high-security credentials for physical access control.

Credentials for Converged Access Control

Protect identities from door to data with our credentials for converged access control. A single credential, available in multiple form factors, can provide access to buildings and IT systems.

uTrust Cards Service Bureau

Our service bureau provides advanced personalization services for all types of plastic credential cards in a variety of markets, including access control, education, hospitality, pharmaceuticals, and hospitals.
